

## Control valves ZA and ZK type

The valves are used for gas and liquid factors.

Execution types: alloy Al and chromium-nickel steel CrNi. In production it is possible using another materials.

Permissible working pressure: 1,0 MPa

Permissible working temperature: 363 K (90°C)

The nominal dimension DN	Control range		Thread G inch	Dimension, mm		
	Water m <sup>3</sup> /h	Air m <sup>3</sup> /h		A	B	C
